

Covid 19 Pandemic - Analysis

This Looker Studio report analyzes the COVID-19 pandemic using the public covid19_open_data bigquery-public-data.covid19_open_data.covid19_open_data dataset from Google BigQuery, covering January 1, 2020, to September 17, 2022. It features interactive visualizations—scorecards for global cases and deaths, time series charts for pandemic trends and vaccinations, a bar chart of top-affected countries, and a scatter plot of vaccination versus mortality rates—complemented by a country filter for targeted analysis. This report provides insights into global COVID-19 trends, showcasing advanced data analysis skills.

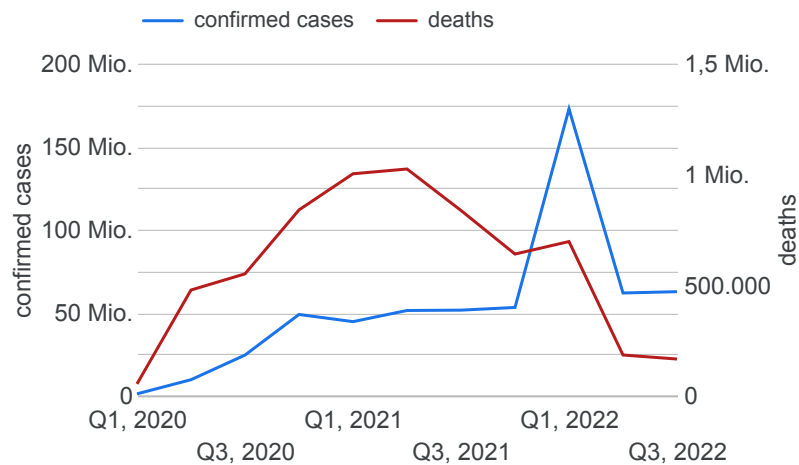

Worldwide Deaths (Covid) 2020-2022

6,5 Mio.

Worldwide Confirmed Cases 2020-2022

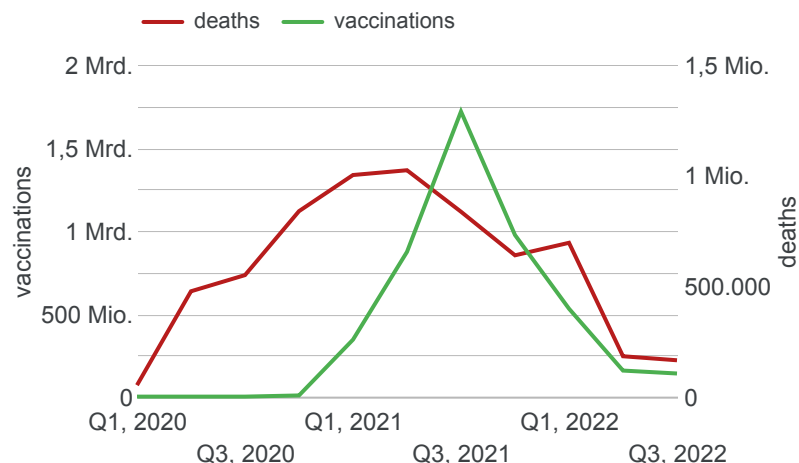

579,7 Mio.

Global Course of the Pandemic (2020-2022)
